

ABSTRACT

A group forming system has
a terminal apparatus which is connected to a network;
accumulating means of obtaining information including
at least one of personal information and preference
information of a user of the terminal apparatus, and of
accumulating the obtained information;

classifying means of classifying a whole or a part of
the information accumulated in the accumulating means, into
a single or plural groups on the basis of a predetermined
classification criterion; and

determining and notifying means of determining the
group to which the user is to belong, from the classified
groups on the basis of predetermined relationships between
the user and the accumulated information, and of notifying
the user of a result of the determination.
